Lesson Classification: UNCLASSIFIED

Lesson ID: 46783-48215

Title: SECURITY AUGMENTATION TO SECURITY BATTALION

Operation/Exercise Name: EMEX-99   Observed: 07 Jun 1999

Originator: MCB QUANTICO
POC: MAJ G.P. AMOROSO Commercial: (703)784-2786   DSN: 2782786

5. (U) OBSERVATION:
Procedures for the mobilization and employment of security augmentees needs to be developed.

6. (U) DISCUSSION:
The AT/FP Plan outlines situations when security augmentation is required i.e., for Gate Sentries, walking patrols, and check points. The order is vague how and when this is to happen. Another issue is whether or not to attach these security forces directly to Security Battalion or have then work independently for an Area Commander.

7. (U) LESSON LEARNED:
None.

8. (U) RECOMMENDED ACTION:
Security Battalion needs to validate security augmentation requirements i.e., the number required, when they are needed, and how they will be employed. Security Augmentees should be under the operational control of the Commanding Officer, Security Battalion.

9. (U) COMMENTS:
None.
